Standard Lists

This is an example of standard itemize and enumerate environments.

- Level 1 Item
- Level 1 Item
  - Level 2 Item (Nested)
  - Level 2 Item

1. First Point
2. Second Point

Math Font Check (Tinos)

Inline math check: $x + y = z$.

Goal: Roman + Bold + Text inside math should match Tinos font.

$$\mathrm{KL}(p \| q) \;=\; \mathbf{W}\, x \;+\; (\text{regularization term})$$

Goal: Check mixed styles (Italic vs Upright).

$$\mathit{loss}(\mathbf{w}) = \sum_{i=1}^{n} \log p(y_i \mid x_i; \mathbf{w}) \quad \text{where} \quad \log \text{ is upright.}$$

Code Example (Google Sans Code)

The following code block uses the theme colors automatically.

```
import math

def softmax(xs):
   """Compute softmax values for a list of numbers."""
   m = max(xs)
   exps = [math.exp(x - m) for x in xs]
   s = sum(exps)
   return [e / s for e in exps]

print(softmax([1.0, 2.0, 3.0]))
```
